UNIVERSITY

Submission instructions

- Everything that you want to submit must be on your github repository

- The actual submission will be done on Moodle as online text which will be just the URL of your github repository

- **Do not submit** on Moodle if your github repository is not ready

UNIVERSITÉ
UNIVERSITY

Submission instructions

- Your repository must contain a release called vF

- Add a runnable .jar file to the vF release
  - Use a jar file created by CircleCI
  - This will ensure that we will be able to run it

- All contents of your repository will be added automatically to the release. This includes your code and the documents to be marked

- Ensure there is a meaningful README file in your repository as well

YORK U

UNIVERSITY

In your release

- Once we download your release, we should be able to find:

1. A README file briefly describing the release

2. All the source code

3. The runnable .jar in the vF release

4. All the documents required by the rubric

- **Make sure that this is the case before you submit!**
